Manage connected browsers and devices

The personal settings page allows you to have an overview on the connected browsers and devices.

Managing connected browsers

In the list of connected browsers you see which browsers connected to your account recently:

List of browser sessions
Image not found or type unknown

You can use the trash icon to disconnect any of the browsers in the list.

Managing devices

In the list of connected devices you see all the devices and clients you generated a device password for and their last activity:

List of connected devices
Image not found or type unknown

You can use the trash icon to disconnect any of the devices in the list.

At the bottom of the list you find a button to create a new device-specific password. You can choose a name to identify the token later. The generated password is used for configuring the new client. Ideally, generate individual tokens for every device you connect to your account, so you can disconnect those individually if necessary.

Adding a new device
Image not found or type unknown

Note

You have only access to the device password when creating it, Folderz will not save the plain password, hence it's recommended to enter the password on the new client immediately.
