

# Upload multiple files

You can upload multiple files at once in three different ways:

- You can upload multiple files when you are browsing for them after having clicked the *Browse* button. Hold down the *Ctrl* key (or *Command* key on a Mac) and click on all the files that you wish to upload at once.
- You can drag and drop multiple files into the *drop zone*.
- You can also place all files into a compressed file, a *.zip file*, and upload that to Folioz. This method allows you to upload multiple files from different folders on your computer at once. You can create a zip file from any number of files that you have selected in your document management program by making a right mouse click and selecting *Compress...* (or something similar).

## Zip files in MacOSX

Zip files in the Finder under MacOSX

## Zip files in Ubuntu

Zip files in Ubuntu's Nautilus

## Zip files in Windows

Zip files in Windows Explorer

Once you have uploaded your zip file to Folioz, you can unzip it there. Click on the *Unzip* button ■ next to the *Edit* button ■. Please follow the on-screen instructions.
